## Sewing Basics

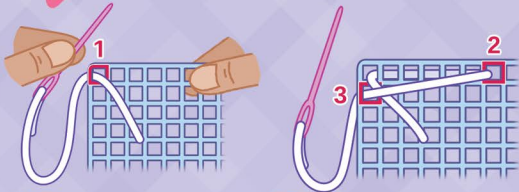

Before you start, let's learn the basic techniques.

### 1 Threading the Needle

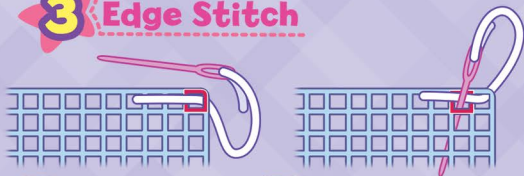

- 1** Undo the thread, cut to your required length.

### 2 Long Stitch

- 1** Insert the needle up through the top of the plastic until you are left with a 2.5cm tail of thread. Hold the tail.
- 2** Count for 7 holes. Pull the needle down through the back of the plastic. Then thread down to the first hole on the next row, as above. Make sure the tail thread is under the main thread.

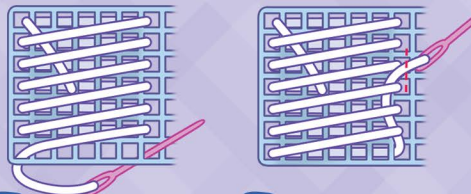

### 3 Edge Stitch

- 1** Insert the needle through the top of the plastic until you are left with a 2.5cm tail of thread. Hold the tail.
- 2** Pull the thread up and insert the needle through to the back of the plastic. Make sure the tail thread is under the main thread.

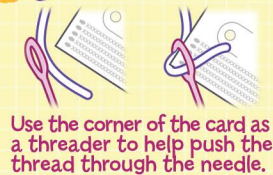

- 2** Insert the thread through the eye of the needle.

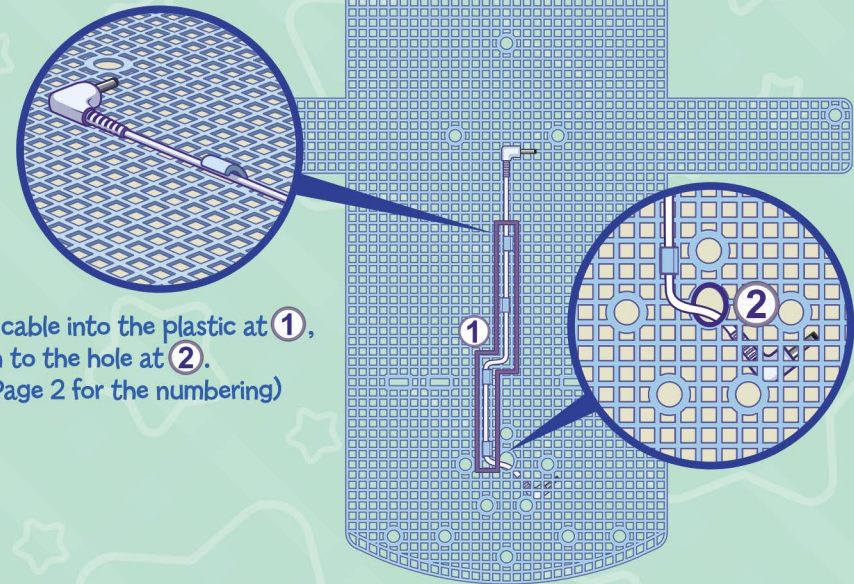

- 3** Repeat the steps until the thread is almost used up.
- 4** Thread the remaining thread inside and pull it tight. Trim it as close to the plastic as possible. Then cut some more thread and continue to sew.

### TIP

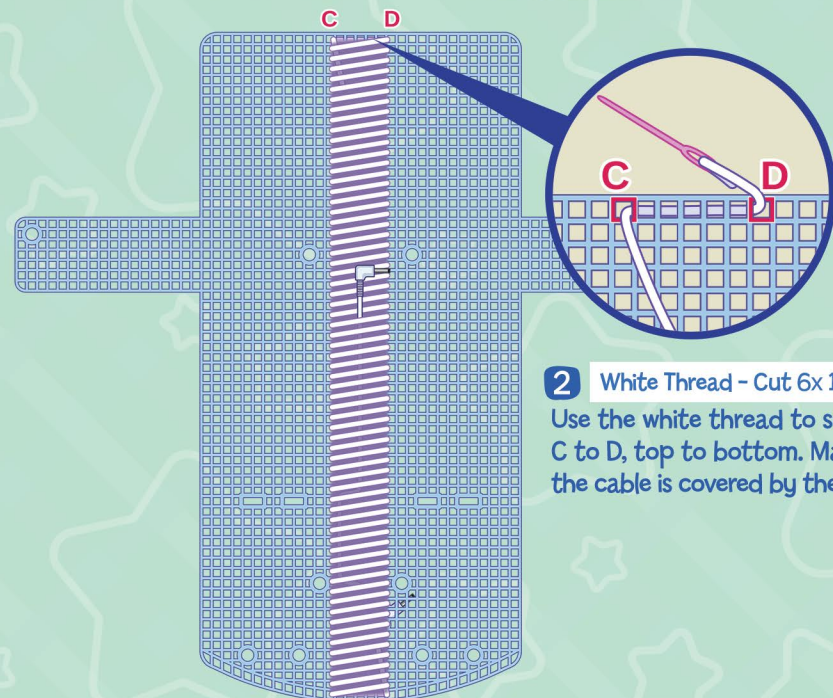

Use the corner of the card as a threader to help push the thread through the needle.

## Create the Bag

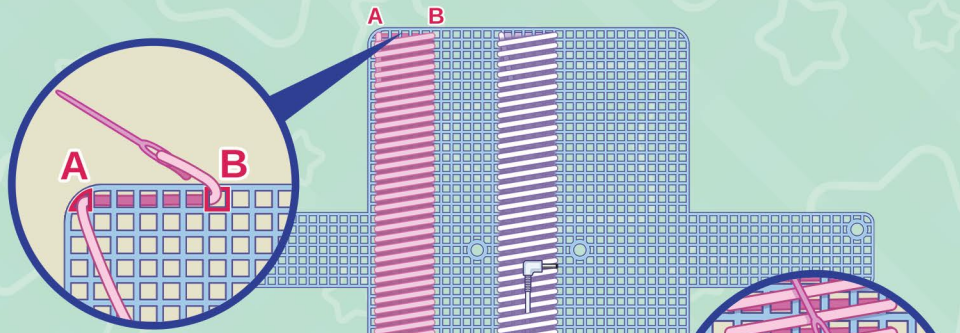

- 1** Insert the cable into the plastic at **1**, then down to the hole at **2**. (Refer to Page 2 for the numbering)

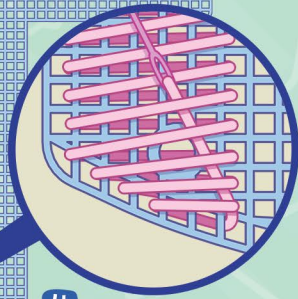

- 2** White Thread - Cut 6x 100cm
